Who are we?

Page: Presentation of the Association

At Des Ailes pour Grandir, we believe that no child should grow up in fear, deprivation, or abandonment. Every child deserves to be protected, supported, and nurtured so they can build their future with confidence.

Our association works in Cambodia with orphaned and vulnerable children, providing concrete and lasting support to those who need it most. Our mission is simple: to create a stable, caring, and opportunity-filled environment, so that every child can thrive fully.

To achieve this, we have chosen a holistic approach that goes beyond the child alone and considers their entire environment. Our actions are organized around three complementary departments.

The **Childhood Department** is at the heart of our commitment. We work to protect children, improve their health and nutrition, ensure access to education, and support their personal development. We also support care centers and local structures that provide daily guidance and care.

The **Family Department** aims to strengthen household stability and autonomy. By supporting housing, access to employment, training, and family health, we help parents and caregivers provide a safer and more stable environment for children.

The **Community Department** works on the environment in which children grow. We participate in the construction and renovation of essential infrastructure, as well as improving access to clean water, electricity, and basic services.

Believing that sustainable change is built together, we work in close partnership with care centers, NGOs, and local community organizations. This collaboration helps strengthen existing initiatives and ensures actions that are respectful, effective, and adapted to the realities on the ground.

Our actions are guided by strong values: compassion and courage, trust and respect, transparency and integrity, commitment and cooperation, hope and empowerment. They guide every decision we make and guarantee the responsible use of the resources entrusted to us.

Through our work, we aim to offer much more than temporary aid: we want to give children the tools to rise, believe in themselves, nurture their potential, and take flight to shape their own future.

Because every feather of hope we add to their wings helps them rise a little higher each day, until the moment they can soar toward a bright and serene future.

Who are we?

Page: Our Vision and Code of Ethics

QUOTE:

"Because we believe that the most vulnerable children are also those whose wings, once unfolded, can reach the highest peaks. All it takes is to believe in them to see them soar."

CF CANVA

Governance:

Julien: Founder & President (Photo 1)

Based in Cambodia, Julien designs, oversees, and leads field actions in collaboration with local stakeholders.

Fanny: Treasurer (Photo 2)

Fanny ensures the association's accounts are accurately maintained.

Mickaëla: Events Manager (Photo 3)

Mickaëla plans, organizes, and coordinates the association's fundraising events, which are essential for carrying out its projects.

Teams:

In Cambodia:

Alongside Julien, Vandy, a committed Cambodian, works daily on the ground to protect children and support the association's initiatives with passion and dedication.

In France:

Our association is proud to rely on a team of dedicated volunteers in France who help bring the association's projects to life and ensure every event is a success. They generously offer their time, energy, and skills to promote the association, support its initiatives, and help the children we serve in Cambodia.

TITLE: Child Labor

In Cambodia, many children are forced to work to help their families, often in dangerous and strenuous conditions. This situation exposes them to physical, psychological, and social risks. Des Ailes pour Grandir actively fights against child labor by raising community awareness, supporting families, and protecting the most vulnerable children.

TITLE: Lack of Schooling

Many vulnerable children do not have access to education, limiting their opportunities and making them more exposed to poverty and exploitation. Des Ailes pour Grandir supports schooling and educational follow-up, assisting children and strengthening local structures to enable them to learn and develop fully.

TITLE: Violence and Abuse

Children may suffer physical, psychological, or sexual violence, sometimes within their family or community. Through the ChildSafe training, our field team implements concrete prevention actions, raises awareness in communities, and intervenes quickly to protect children and provide appropriate support.

TITLE: Trafficking and Exploitation

Cambodia faces child trafficking and exploitation, particularly for forced labor or sexual purposes. Des Ailes pour Grandir collaborates with local partners, including M’Lop Tapang, to prevent these situations, protect at-risk children, and reintegrate them into a safe environment that respects their rights.

TITLE: Children’s Rights

All our actions are guided by the Convention on the Rights of the Child (CRC, 1989), which guarantees the right to education, protection, health, and well-being. Each project aims to defend these rights and create an environment where children can grow, thrive, and build their future.

TITLE: ChildSafe: Prevention and Safety

As a member of the ChildSafe network, our association applies international standards to protect children and prevent all forms of abuse. Our field team has completed the associated training, enabling us to act effectively every day in our programs and events to ensure a safe environment for all children under our care.

Page: Health and Nutrition

TITLE: Access to Basic Healthcare

In Cambodia, access to healthcare remains limited for many children and families, especially in rural or disadvantaged areas. Des Ailes pour Grandir supports access to primary care by funding medical consultations, assisting families, and ensuring regular follow-up to prevent and treat common illnesses.

TITLE: Nutrition and Food

Malnutrition still affects a significant number of Cambodian children, impacting their growth, cognitive development, and long-term health. We provide balanced meals and tailored nutritional support while raising families' awareness of the importance of a healthy diet for children's development.

TITLE: Hygiene and Prevention

Diseases related to unsafe drinking water, poor sanitation, or inadequate hygiene are common. Des Ailes pour Grandir works to improve hygiene by supporting awareness programs, providing sanitation supplies, and encouraging preventive practices within families and care centers.

TITLE: Overall Well-being

Health is not limited to the body: emotional and psychological well-being is essential. Our programs therefore include holistic well-being support, offering educational, recreational, and psychosocial activities to strengthen children's resilience and confidence.

TITLE: Access to School

In Cambodia, many vulnerable children do not have access to regular schooling due to poverty, distance, or lack of resources. Des Ailes pour Grandir supports schooling by assisting children and their families so they can attend school and benefit from a stable and continuous learning experience.

TITLE: Academic Support and Learning Development

Even when enrolled in school, some children need additional support to progress and consolidate their knowledge. We provide tutoring and educational activities tailored to their needs to build confidence and promote academic success.

TITLE: Inclusive Education and Awareness

Education goes beyond academic subjects. Des Ailes pour Grandir promotes an inclusive approach that incorporates respect for children's rights, awareness of protection, hygiene, and citizenship, preparing children to become responsible and fulfilled adults.

TITLE: Personal Development

Learning also means growing in confidence and autonomy. Our programs include psychosocial and creative activities that stimulate curiosity, strengthen self-esteem, and develop children's social and emotional skills.

Page: Personal Development

TITLE: Building Self-Confidence

Self-confidence is key to enabling children to believe in their abilities and face life's challenges. Des Ailes pour Grandir offers psychosocial activities and workshops that help each child feel valued, recognized, and capable of taking action for their future.

TITLE: Social and Emotional Skills

Well-being involves managing emotions and interacting positively with others. Our programs develop empathy, communication, and cooperation, giving children tools to handle conflicts, express themselves confidently, and build healthy relationships with those around them.

TITLE: Creativity and Personal Expression

Artistic and creative expression is a powerful way for children to discover their identity and unlock their potential. Des Ailes pour Grandir organizes artistic, cultural, and sports workshops that foster imagination, autonomy, and confidence in their unique talents.

TITLE: Resilience and Preparing for the Future

Supporting a child means giving them the means to overcome obstacles and envision a secure future. We encourage resilience and perseverance through activities that strengthen motivation, the ability to recover from setbacks, and the capacity to build a fulfilling personal path.

Page: Support for Children's Homes

TITLE: Supporting the Structures

Children's homes and orphanages play a central role in protecting and supporting vulnerable children. Des Ailes pour Grandir supports these institutions by working closely with their staff, providing guidance, monitoring, and operational assistance to strengthen their capacity to meet children's needs.

TITLE: Staff Training

The quality of care is essential for children's well-being and development. We fund and organize training for staff to improve their skills in education, child protection, health, and psychosocial support.

TITLE: Provision of Materials and Resources

A well-equipped and suitable environment is crucial for children's development. Des Ailes pour Grandir provides educational materials, sanitation equipment, and essential resources, ensuring a safe, stimulating, and comfortable setting for children.

TITLE: Enhancing Children's Well-being

Beyond material and educational support, our work with children's homes aims to create a protective, warm, and caring environment where each child can grow safely, develop skills, and thrive fully.

Families

Page: Housing and Family Stability

TITLE: Housing Reconstruction and Renovation

Safe and suitable housing is essential for the well-being and safety of children and their families. Des Ailes pour Grandir supports the renovation and reconstruction of homes, providing durable housing that protects families from environmental risks and improves their quality of life.

TITLE: Access to Stable Housing

Residential stability is a fundamental pillar for children to grow up in a secure environment. We help families find safe and lasting housing, reducing the risks of frequent moves, instability, and social vulnerability.

TITLE: Prevention and Safety

Housing is not just about walls: it also involves ensuring safety, hygiene, and a nurturing environment for family life. Des Ailes pour Grandir implements prevention actions, raising families' awareness of best practices and ensuring healthy and protective living conditions for children.

TITLE: Strengthening Family Well-being

At the heart of our actions is comprehensive family support. We contribute to creating a stable and protective home where children can grow up safely and parents feel supported and guided in their educational role.

Page: Training and Employment

TITLE: Training and Employment

Access to professional skills and stable employment is essential for families' autonomy and security. In many Cambodian communities, the lack of training and opportunities limits parents' and young adults' prospects, increasing the risk of poverty and vulnerability for children.

Des Ailes pour Grandir supports families by offering practical workshops and training tailored to the local market, while also promoting the creation of micro-enterprises to generate sustainable income. Support is individualized, with follow-ups, advice, and mentorship to help each family develop autonomy and strengthen economic stability. These actions enable parents to better meet their children's needs and create an environment conducive to their development and well-being.

TITLE: Financial Support

Poverty often prevents families from covering essential needs, such as housing, healthcare, food, or education. Des Ailes pour Grandir provides targeted financial support through microloans, one-time grants, or guidance to access available social assistance. Combined with training and professional support, families gain security and independence, strengthening their ability to offer a stable and protective home for their children. Through these initiatives, families regain confidence in themselves and in the future, creating an environment where children can grow up safely, peacefully, and with every opportunity to thrive.

Page: Family Health and Well-being

TITLE: Family Health and Well-being

The health and well-being of every family member are essential for creating a stable, protective home that supports children's development. In many Cambodian families, access to healthcare, health information, and psychological support remains limited, which affects daily life and children's growth.

Des Ailes pour Grandir takes a holistic approach to address these needs. We facilitate access to medical and preventive care, such as consultations, vaccinations, and monitoring of common illnesses, while educating families on proper hygiene, healthy nutrition, and disease prevention. At the same time, we provide emotional and psychosocial support to parents and children to strengthen resilience, balance, and family stability.

These actions help create an environment where children can grow up safely and thrive, while parents gain the resources, knowledge, and support needed to promote their children's overall development and build a more secure future for the entire family.

Page: Construction, Development, and Renovation of Community Infrastructure

TITLE: Construction, Development, and Renovation of Community Infrastructure

Solid and well-suited infrastructure is essential to improve residents' lives and strengthen the social fabric of communities. In many regions of Cambodia, access to safe, functional, and well-maintained buildings remains limited, which can hinder local development and restrict access to essential services.

Des Ailes pour Grandir supports the creation, renovation, and development of community infrastructure to address these needs. Whether it involves educational centers, meeting places, multipurpose halls, or spaces for social and cultural activities, our efforts aim to provide safe, accessible, and stimulating environments for all.

These projects not only improve living conditions but also strengthen community cohesion and dynamics, offering residents and children a supportive framework for learning, growth, and collective well-being.

Page: Water, Sanitation, and Basic Services

TITLE: Water, Sanitation, and Basic Services

Access to clean water, adequate sanitation facilities, and basic services is essential for the health, dignity, and development of communities. In many regions of Cambodia, these infrastructures remain insufficient, exposing residents—especially children—to significant health risks.

Des Ailes pour Grandir works to improve access to water, sanitation, and essential services by supporting the construction and renovation of wells, drinking water systems, secure toilets, and compliant sanitation facilities. Our efforts help ensure safer living conditions, improve hygiene, and prevent waterborne and sanitation-related diseases.

By strengthening these infrastructures, we also contribute to community stability and autonomy, while providing children and their families with a healthy, safe environment that supports education, health, and overall well-being.
